SECTION - II

1.0 INTRODUCTION TO THE PROJECT

The Additional Chowbhaga Pump House on Intercepting Canal was commissioned in the year 1972. Since then it is under continuous operation. This Pump House plays a pivotal role in draining out storm water as well as drainage water from a vast area of East Kolkata viz Borough XII and some parts of Borough XI, X & VII through Tollygunge Panchannagram (TP) main Canal system. It is experienced from past few years that a vast area of TP Basin were inundated for a substantial period during rainy season. To get relieve of the inhabitants of that area, it is proposed for augmentation of Additional Chowbhaga pumping station, at Chowbhaga, Dist.24 Pgs (S). Recently a pump performance study was conducted through a reputed VT pump Original Equipment Manufacturer (OEM) and it is revealed that the efficiency of all the Pump-Motor sets have been drastically lowered down to uneconomic value. Due to absence of any gravity flow pumping operation is required for round the year. This canal carries high volume of drainage water with municipal debris, fibers and silts.

1.1 LOCATION

The existing Pumping Station is located at the outfall of Intercepting Canal at SWF Channel, Paschim Chowbhaga, , P.S : Anandapur, Dist- 24 PGS(S) , West Bengal.

1.2 OBJECTIVE

Objective of Augmentation of the existing Additional Chowbhaga Pumping Station is to provide intended extent of relief to the command areas of the existing Pumping Station from water logging by replacement of old Pump-Motor set with energy efficient new Pump-Motor set. This will lead to significant improvement of environment quality in the area and also the economic improvement of the community. Augmentation of Pumping Station of adequate capacity at out fall locations of the canals to reduce the frequency and extent of flooding thereby improving the level of service provided by the canals.
