SECTION - II

1.0 INTRODUCTION TO THE PROJECT:

The Additional Chowbhaga Pump House located at the outfall of intercepting channel was commissioned in the year 1972. Since then it is under continuous operation. This Pump House plays a pivotal role in draining out storm water as well as drainage water from a vast area of East Kolkata viz Borough XII and some parts of Borough XI, X & VII through Intercepting Channel of Tollygunge Panchannagram(TP)main Canal system. There are 10 nos 50 cusec pumps are installed at the pump house. Every year, pre-monsoon maintenance is carried out of the pumps for proper performance during rainy season. It takes much higher time for maintenance by using existing manual operated overhead crane; as a result the maintenance work take higher time. Also due to high flow of plastics and other floating and submerged garbage in rain water, pumps get clogged and those require urgent maintenance to make the pump in operational condition. For this purpose EOT crane is essential to minimise the maintenance time, engagement of manpower and make the pumps ready for operation to handle storm and drainage water efficiently.

1.1 LOCATION:

The existing Pumping Station is located at the outfall of Intercepting Channel Paschim Chowbhaga, P.S : Anandapur, Dist- 24 PGS(S) ,West Bengal.

1.2 OBJECTIVE:

The objective for the work of Supply, installation, testing and commissioning of new 10 M.T. capacity double girder Semi-EOT crane along with fixing of DSL system at Additional Chowbhaga Pumping Station is to make the maintenance of pumps and motors more efficiently and also reduce the maintenance time and number of manpower required for maintenance and make the pumps ready for operation to handle storm and drainage water efficiently.

2.0 BRIEF SCOPE OF THE PROJECT :
